CAREER OBJECTIVE

Enthusiastic software developer with practical experience in Java, Python, Web Development, and AIML. Built and deployed projects involving machine learning models and dynamic web applications. Certified in Java, Python programming and web technologies. Eager to contribute technical expertise to collaborative and innovative software solutions.

EDUCATION

Degree/Exam	Year	College/Institute	Score
B. Tech - CSE(AI)	2022 - Present	Madanapalle Institute of Technology & Science	CGPA : 8.7(7th Sem)
Intermediate - M.P.C	2020 - 2022	A.P. Model School & Jr. College	Percentage : 73.7
SSC	2019 - 2020	A.P. Model School & Jr. College	Percentage : 91.3

SKILLS

- Programming Languages : Java, Python
- Artificial Intelligence, Machine Learning, Adobe Experience Manager
- Web Technologies : React.js, HTML, CSS, JavaScript
- Database & Cloud: SQL, MongoDB & AWS Cloud

PROJECTS

BGMI Victory Predictions Using ML Classification Algorithms

- Developed a classification model to predict BGMI match outcomes using player statistics, in-game factors, and past performance.
- Collected and preprocessed large datasets to handle missing values, normalize features, and improve model accuracy.
- Compared results across multiple classification algorithms to identify the most suitable approach.

Portfolio Website

- Created a responsive personal portfolio website to showcase projects, skills, and achievements.
- Added sections like Home, About Me, Projects, Skills, Certificates, and Contact for easy navigation.
- Included downloadable resume and certificates for quick access to credentials.
- Displayed projects with images and short descriptions to clearly show technical skills

INTERNSHIPS

Domain : Machine Learning **10/06/2024 - 10/08/2024**
Organization : Pragyashal **Remote**
Description : In this internship the project used to predict the BGMI match outcomes by applying machine learning on player stats, in-game parameters, and past performance trends. Built in Python with Scikit-Learn, it includes advanced data preprocessing, feature engineering, and comparison of multiple classification algorithms to achieve high accuracy. The complete open-source code is available on GitHub for further use and enhancement.

Domain : Web Development **11/08/2025 - 11/10/2025**
Organization : Intern Certify **Remote**
Description: In this internship developed a responsive personal portfolio website using HTML, CSS, JavaScript to show the projects, skills, and achievements through a clean and user-friendly interface. The website features structured sections including Home, About Me, Projects, Skills, Certificates, and Contact for seamless navigation to clearly highlight technical capabilities, along with downloadable resume and certificates for quick access to credentials.

Domain : Adobe Experience Manager **01/02/2026 - Present**
Organization : Cognizant **Onsite**
Description: During this internship, I am working with Adobe Experience Manager (AEM) to build and manage web pages using reusable components and templates. I am learning basic concepts like HTL, Sling, and content structure.

CERTIFICATIONS

- Java Programming - HKUST.
- Python Programming - Meta.
- HTML, CSS, JavaScript - Infosys Springboard.
- SQL and Relational Databases 101 - IBM SkillsBuild.
- AWS Cloud Practitioner Essentials - NASSCOM.
- React : The Complete Guide - Udemy
